

The Leader in  
Controls & Electrification  
In the Overhead Materials Handling Industry

## Driving The Future

- AC Variable Frequency Drives
- Engineered Systems
- Master Switches
- Pendant Stations
- Radio / Wireless Remote Controls
- Variable Frequency Drive Accessories

[www.drivecon.com](http://www.drivecon.com)

## PRODUCTS

- AC magnetic control systems
- DC magnetic control systems
- Dynamic Braking Resistors
- Filters, suppressors
- Line reactors
- Radio remote controls, hand held or belly box systems
- Pendants, loose or pre-wired
- AC Motors with or without encoders
- Master switches, operator stands and chairs
- Complete plug-in festoon systems and pendants
- Complete modernization control packages engineered to meet each individual application requirement
- Synchronization of independent motions, laser position control
- Full System Engineering, PLC's, Automation etc.

## VALUE

For over a decade, Drivecon, Inc. has been a supplier of drive systems to crane manufacturers for a wide range of applications including aerospace, automotive, power generation, steel, paper and many other industries.

## SERVICES AND SUPPORT

- Design and fabrication of variable speed drive panels and automation systems with magnetic control
- 24 hour technical support available @ 224-627-7160
- On-site commissioning and startup service ensures that your system operates at maximum productivity
- Full drive repair facility for Drivecon brand plus other major brands of AC drives
- Stocking depot of drives, drive panels, radios and pendants
- Complete training services for sales, applications and service personnel

## TRAINING

Drivecon University provides training for Engineers, Technicians and Sales on today's crane control systems. Multiple level courses covering Drivecon's Variable Frequency Drives (VFD), wireless radios, and other products are available. This free service is part of our commitment to customer service excellence by providing continuous development training and support.

## EXPERTISE

Drivecon has the products, knowledge, experience and technology to design, fabricate and support all your controls and electrification needs. Our products range from standard and custom Variable Frequency Drive (VFD) panels, motors, radio controls, pendant stations and quick festoon systems to complete turnkey modernization projects. Furthermore, we provide 24/7 technical support as well as repairs for many major brands of VFD's. The new Drivecon goes beyond its local capabilities; our global network of world class suppliers, partners, and affiliates specialize in controls and electrification for the overhead crane and material handling industry.
